

AIVOA PHARMACEUTICALS - DEVIATION INCIDENT REPORT

Report ID: DEV-2026-0894 | Facility: API Synthesis Facility - Plant 1

Date of Occurrence: 2026-09-24 | Source: Production Operator

PRODUCT AND BATCH INFORMATION:

Product: Paracetamol API (Acetaminophen BP/USP Grade)

Batch / Lot Number: API-260924

Affected Quantity: 500 kg

Stage: Fluidized Bed Drying (Cleanroom Suite 104)

INCIDENT DESCRIPTION:

During the manufacturing and drying of Paracetamol API batch API-260924, the drying temperature exceeded the approved validated range of 70-75 C and reached 82 C for approximately 18 minutes.

The event was detected by the production operator following a SCADA console alert.

The operator initiated emergency cooling bypass to return temperature to 72 C.

IMMEDIATE ACTIONS AND CONTAINMENT:

The affected 500 kg batch has been placed on physical and electronic QA quarantine hold pending formal investigation. Yellow quarantine labels applied to IBC-401.

Composite sampling requested for HPLC degradation impurity profiling.
